

EXPERIMENT 6

Experiment with different layouts and color schemes for an app.

Collect user feedback on aesthetics and usability using

GIMP(GNU Image Manipulation Program (GIMP))

NAME : HEMASHREE R

ROLL NO:240701190

Aim

To experiment with different UI layouts and color schemes for a mobile application and evaluate user preferences on aesthetics and usability using GIMP.

Tools Used

- **GIMP (GNU Image Manipulation Program)** – for designing and editing UI layouts
- **Computer/Laptop** – for design work
- **User Feedback Methods** – surveys, questionnaires, or interviews

Explanation of Each Layout

1. Light Theme

- Uses a bright background with blue and green accents
- Clean and simple design with high readability
- Suitable for daytime use
- **User Experience:** Easy on the eyes, familiar, and beginner-friendly

2. Dark Theme

- Uses a black/dark background with green highlights
- Reduces eye strain in low-light environments
- Modern and stylish appearance
- **User Experience:** Preferred for night usage, but may reduce readability for some users

3. Green Theme

- Dominant green color reflecting eco-friendly branding
- Balanced contrast with light background
- Consistent theme aligned with app purpose (sustainability)
- **User Experience:** Visually appealing and meaningful, but excessive green may feel repetitive

User Feedback Collection

- Users were shown all three layouts
- Feedback collected based on:
 - **Aesthetics** (color appeal, design attractiveness)
 - **Usability** (ease of navigation, readability)
 - **Preference** (favorite layout)

Common Observations:

- Light theme preferred for clarity and simplicity

- Dark theme liked for modern look and night use
- Green theme appreciated for branding and uniqueness

Result

Different layouts and color schemes were successfully created using GIMP. User feedback indicated that while all designs were functional, the light theme was most preferred for usability, the dark theme for comfort in low light, and the green theme for its strong visual identity. This experiment highlights the importance of offering theme options to enhance user experience.
